

Type or Symbol:	Catalog #: ESP -
-----------------	---------------------

Description:

The Emergency Sport Pack (ESP) is a light pole mounted emergency lighting fixture. It is designed to provide automatic emergency lighting when utility or normal power is interrupted. The ESP utilizes 35 watt HID lamp and ballast technologies combined with an inverter unit to provide 90 minutes of emergency lighting to cover bleachers, common areas and stadium areas at outdoor venues to allow occupants to safely leave these areas.

Features:

Inverter Unit is certified by ETC or CSA to UL 924 requirements.

Inverter Unit has a fully gasketed NEMA 4X rated fiberglass housing.

Lamp heads are compact NEMA heavy duty die-cast aluminum construction. Lens is thermal and shock resistant, 1/8" clear Tempered glass. Lamp heads are UL listed for wet locations.

Lamp heads feature one piece anodized aluminum-faceted parabolic construction to achieve RB distribution.

Mounting Plate is 1/4" aluminum and mounts to light pole with supplied stainless steel straps.

Electrical:

Internal heater to allow operation in all weather conditions.

Maintenance-free, sealed lead calcium or Nickel Cadmium battery.

Inverter unit has on Board Test Switch for Local Inspection and Testing.

35 Watt HID lamps and ballast for exceptional lighting distribution.

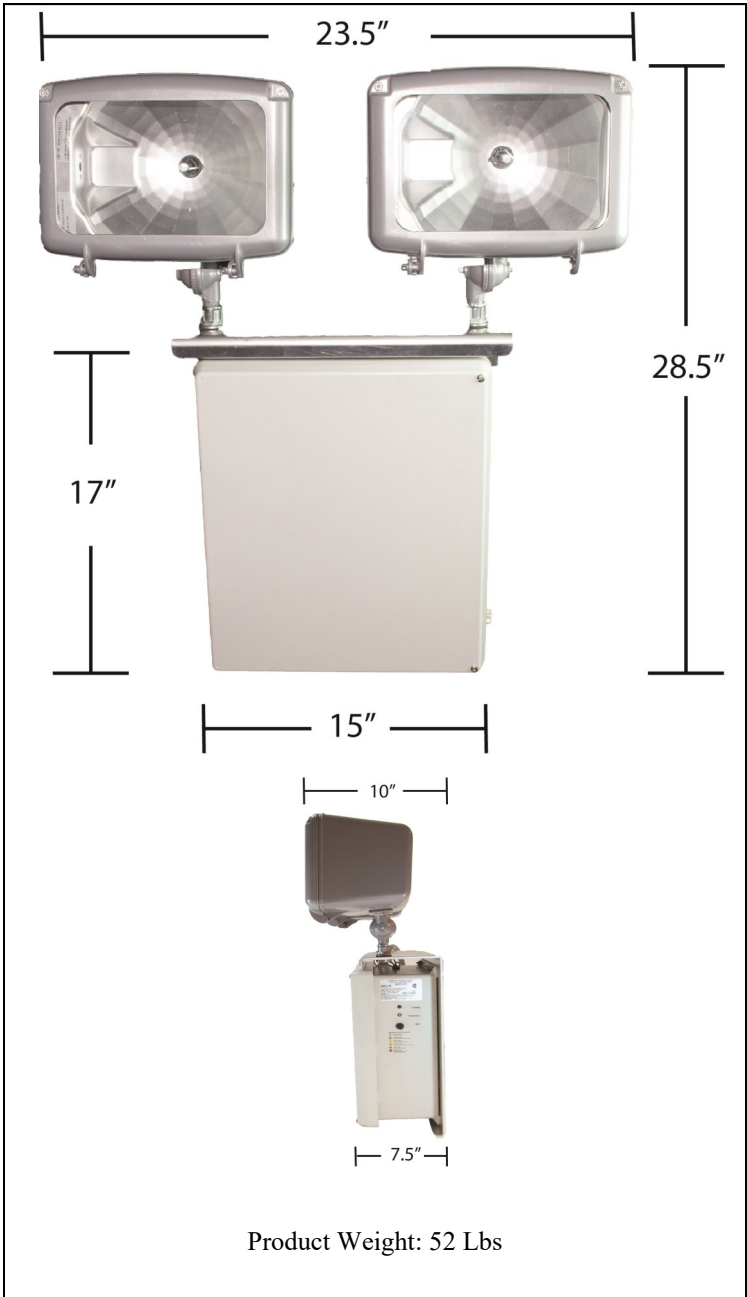

Integrated self diagnostics and Time delay.

Single voltage rated for 120v or 277v— Specify when Ordering

Warranty: Limited 3 year product replacement warranty. Contact Nine 24 Inc. for complete Warranty Information.
